

Focus Fast Track: Application services

Our fast track services are designed to help you make the most of your Web Application services investment by enhancing your existing tools, implementing new features and delivering ongoing optimisations.

Welcome to Focus Group's Fast Track service for Cloudflare's core services.

As a Cloudflare Authorised Service Delivery Partner (ASDP), we are among a select few partners that have the skills and knowledge to help you successfully deploy your new Cloudflare Web Application services.

Whether you're a new or existing Cloudflare customer you can choose the engagement below that suits your needs and helping to improve your web performance, security and reliability. Including features that:

- Enable faster loading times, improved mobile experiences, and lower bandwidth usage.
- Protect websites and web applications against a range of online threats, including DDoS attacks, SQL injection, and cross-site scripting (XSS).
- provide a scalable, high-performance infrastructure that ensures their online assets are always available and fast to load.

Onboarding & project initiation
