

Welcome to our May newsletter!

As we embrace the longer days and the “summer’s coming” energy in the air, this month we’re celebrating the power of connection – through sport, community, innovation and technology. From the inspiring work of Focus Foundation to the expansion of our healthcare tech services, we’ve got lots to share. Plus we’re diving into the cloud and putting cyber security under the spotlight. So, grab a cuppa and let’s go...

Focus in sport

We firmly believe in the positive impact sport has upon life - keeping us physically fit, improving our mental health, raising community spirit, having fun and bringing us together socially - whether it’s to participate or to cheer others on.

So, beyond the world of technology, we’re passionate about championing individuals and teams on the road to sporting success. We’re keen to help young people reach their full potential, enable grassroots teams to raise their game and voice our support for our favourite pros.

From Brighton & Hove Albion FC to Exeter Chiefs, you can find out more about our sporting endeavours here.

Welcoming Voice Connect

Hot on the heels of the news about our acquisition of Matrix247, we’re excited to welcome the Voice Connect team - specialists in telecommunications, NHS systems integration and self-serve automation – to the Focus Group family.

This move aligns perfectly with our shared vision - delivering smarter, AI-powered solutions to primary care providers. Together, we’re helping health & care services work more efficiently than ever before.

Is your business cyber safe?

In light of the latest attacks on big British retail brands and even bigger impact (both financial and reputational), you may well be questioning your own cyber protection levels. Now’s the time to act.

We’re currently offering a FREE Cyber Security Gap Analysis review which will identify all risks within your organisation and guide you through the steps you need to take towards securing your systems and your reputation. Let’s protect your business.

From Truro to Inverness

Focus Group is more than just a national supplier of business technology. We operate a tight-knit network of local offices and teams available 24/7, from Truro to Inverness and everywhere in-between. So, whether you’re having issues with the cloud or your hardware’s playing up, we’re just around the corner and here to take care of your business technology needs. So you’ll have the freedom to focus on what matters most.

FOCUS FOUNDATION

Real stories. Real impact.

At Focus Foundation, we’re driven by the incredible grassroots charities we support. This month, we’re proud to highlight Read for Good, a charity bringing the magic of storytelling to children in hospitals.

Thanks to an £8,000 grant from the foundation, Read for Good delivered 113 hours of storytelling, donated 340 new books, and reached 763 young patients across hospitals in Manchester, Brighton, Devon & Exeter, and Glasgow. As one nurse shared:

“You can see the way the children’s faces light up as they get lost in the stories - it’s a beautiful thing to witness.”

These powerful moments are only possible because of our supporters. To read more about the projects we support and the communities we serve, step this way...

The sky’s the limit

If you’re weighing up a move to the cloud, our latest blog has been written just for you!

We focus on what matters most (money) and break down the real cost benefits of moving your business to the cloud. From streamlined operations to reduced overheads and scalability, cloud adoption could be the best move your business makes this year. Finances, flexibility and future-proofing, we’ve got you covered.

[The economics of cloud adoption](#)

Let’s connect. Let’s grow.
