# Seamless firmware management with Router Secure & Router Protect

Managing firmware updates for your network devices is crucial for maintaining optimal performance and security.Our Router Protection services provide a streamlined and automated solution to ensure your equipment stays up-to-date, ensuring you can focus on what truly matters - running your business efficiently.

Router Secure & Router Protect: Efficient router updates

Focus Group leverage an auto configuration Server (ACS) to streamline the process of updating your TP-Link or Draytek router(s). This automates the firmware update process, ensuring that your devices are always running the latest and most secure versions without the need for manual intervention. The ACS server handles everything from scheduling updates to verifying the integrity of the update files, providing a seamless and reliable update experience.

Safety

Firmware updates are essential for protecting your network and employees against vulnerabilities and cyber threats. Router Protect guarantees that your router(s) are always running the latest, most secure firmware versions. It employs robust security protocols to ensure the integrity of the update files and the updating process. Regular updates mitigate the risks associated with outdated firmware, providing a secure environment for your network operations.

Simplicity

Your hardware is received pre-configured, allowing for easy management of firmware updates. All centrally managed by Focus Group. The service automates the update process, eliminating the need for manual interventions and reducing the risk of errors. Ensuring your device is up to date at all times.

Peace of Mind

You can rest assured that your firmware updates are managed reliably and efficiently. This proactive approach minimizes downtime and ensures your network devices are always functioning at their best. Knowing that your router(s) are consistently updated and protected allows you to focus on growing your business without worrying about technical maintenance.

Experience the ease and confidence that comes with seamless firmware management - **choose Router Secure or Protect today.**

✓ **Simplicity** - let Focus Group manage the risk for you
